Colligo Administrator

Easily deliver and manage consistent SharePoint access for Colligo apps, across every platform and device

Configure once. Access everywhere.

Colligo Administrator enables enterprises to increase efficiency and reduce costs by providing centralized configuration of Colligo apps. This powerful server-based tool is the perfect companion to all Colligo products as it ensures a consistent user experience, on every platform and device.

Central administration of users' SharePoint sites, folders and favorites makes it easy for users to file to the right locations and access the right content without needing to understand SharePoint.

- Centrally-configure user access to SharePoint sites, folders, and favorites

- Support corporate governance initiatives with secure, role- and policy-based SharePoint access

- Ensure appropriate access with configuration on a per-user or departmental basis

- Manage policy and security settings for apps, such as sync configuration and content sharing policies on mobile devices

"SharePoint and Colligo make records management so easy that employees do it every day. Colligo Administrator makes email management even easier."

- Dan Vasey, Director of Records and Information Management, Charter Communications

Powerful tools for content managers and IT administrators

- Centrally configure and manage consistent SharePoint access and settings across all devices

- Use group policies to configure SharePoint locations and remote settings for thousands of users with a single entry

- Easily push out new SharePoint document libraries for easy project and team management

- Support corporate governance through secure, centrally-enforced role- and policy-based SharePoint access

- Ensure data security with the ability to restrict features such as "Open in" or the ability to share content outside of the secure Colligo environment

- Non-technical staff, such as records managers and other business data owners, can easily manage SharePoint access

- Installed on SharePoint so it's easy to deploy

Colligo

Easy, consistent access for SharePoint users

- Simplify content management with consistent content across every device

- Eliminate the need for users to set up links to SharePoint sites or use long, complex URLs

- Streamline collaboration by providing only relevant content

- Make it simple to view or file content in the right location
