SharePoint Product Roadmap

Q2/Q3 CALENDAR 2016

- SharePoint home on the web
- Modern document libraries
- Modern page authoring
- SharePoint mobile app (iOS)
- SharePoint mobile app preview (Windows, Android)
- Modern lists with Power Apps & Microsoft Flow
- Site activity and insights
- Office 365 Groups get team sites
- SharePoint Framework Preview

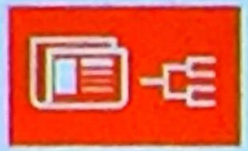
Q4 CALENDAR 2016

- Feedback driven updates to doclibs, lists, pages, sites, apps
- Team news
- Intelligent People Cards
- SharePoint mobile app WW Release (Windows, Android)
- Next gen sync of team sites
- Simple, fast site creation
- SharePoint Framework WW Release

H1 CALENDAR 2017

- Feedback driven updates to doclibs, lists, pages, sites, apps
- More web parts
- Publishing Sites
- More Flow and PowerApps integration
- SharePoint Add-in improvements
- Modern team site extensibility
- Performance-focused CDN integration with publishing sites

Top of mind for 2017



Corporate news and publishing content flows

Team site power users (Microsoft Flow and Power Apps)

ECM, metadata, templates, and content types

Yammer integration into team and publishing sites

Branding across mobile and web

Analytics and intelligence across files, sites, and pages

The Security conversation has changed…

THE MOST **TRUSTED** PLATFORM

PRODUCTIVITY WITHOUT COMPROMISE

INTELLIGENT SECURITY FOR NEW THREATS

Windows 10 Enterprise

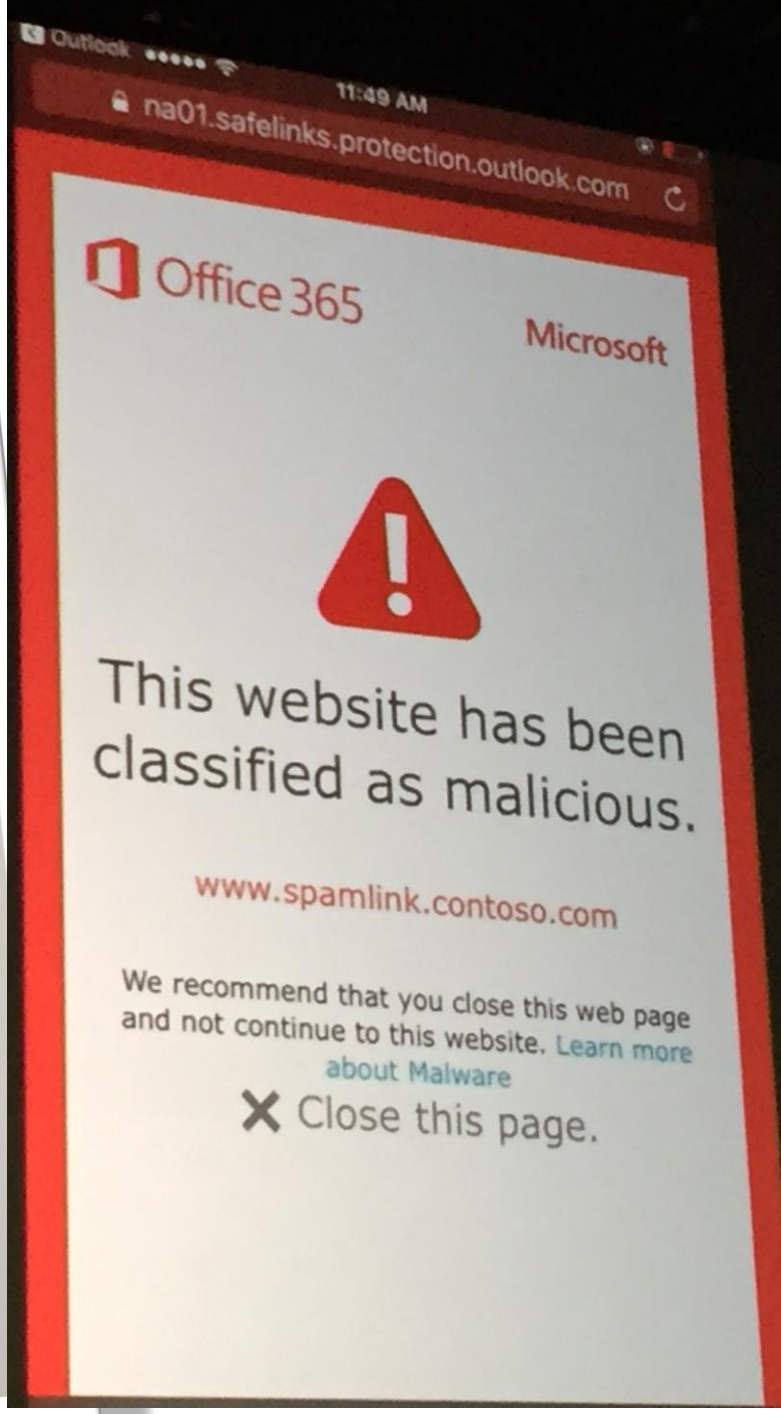
- Windows Trusted Boot
- Windows Hello
- Windows Credential Guard
- Windows Device Guard
- Windows Information Protection
- Defender Advanced

Office 365

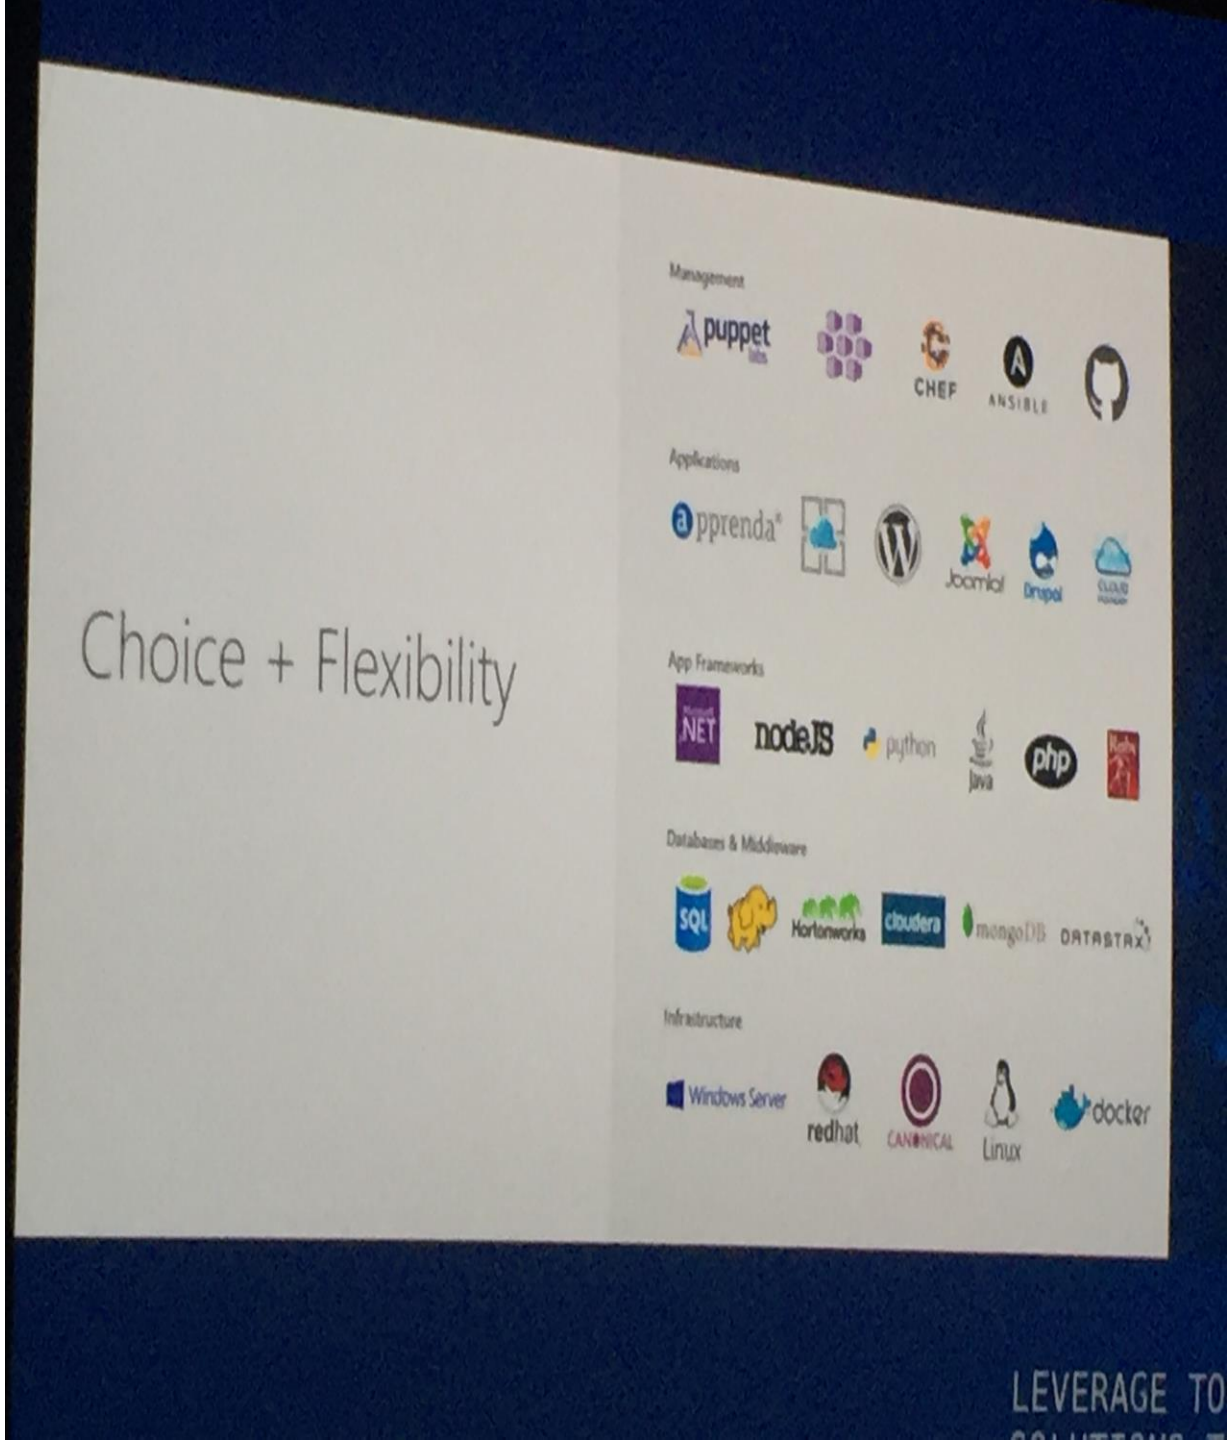
- Office 365 Advanced Threat Protection
- Office 365 Advanced Security Management
- Office 365 Data Loss Prevention

Enterprise Mobility + Security

- Azure Active Directory Identity Protection
- Azure Information Protection
- Microsoft Advanced Threat Analytics
- Microsoft Cloud App Security
- Microsoft Intune



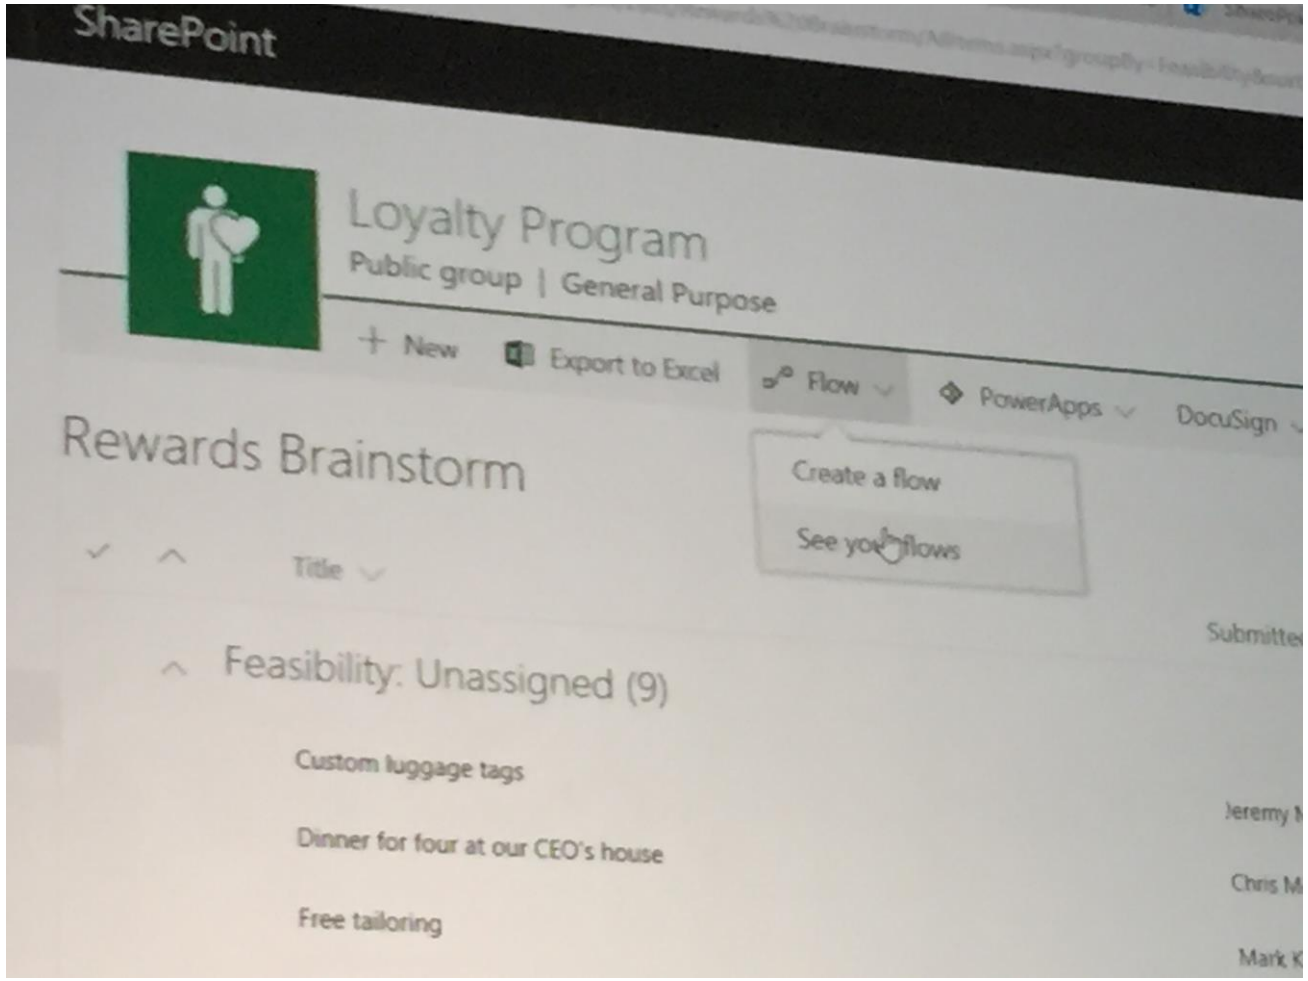
What's the democratization of IT and how visible was this at Ignite?



87% of Senior Management admit to using personal storage for work files.

87% of senior managers frequently or occasionally send work materials to a personal email or cloud account to work remotely, putting that information at a much higher risk of being breached. Released today by global investigations, intelligence, and risk services company Stroz Friedberg, the survey, "On the Pulse: Information Security Risk in American Business," also found that 58% of senior management reported having accidentally sent the wrong person sensitive information, compared to just 25% of workers overall.

Will Flow and PowerApps truly be the replacement for InfoPath and SharePoint Designer?



Infopath & SharePoint Designer vs. PowerApps & Flow

- Infopath 2013 supported until 2026
  - PowerApps is the successor to InfoPath, but does not seek feature parity.
- SharePoint Designer 2013 is supported until 2026
  - Flow is the successor to SPD Workflows for “basic” automation
- Flow and PowerApps will have further governance by release

- Flow & PowerApps (limited #) will be included as part of the license at no additional cost in most Office 365 and Dynamics 365 SKUs with slight differences in Home and Personal SKUs

Future improvements

- Support for images, attachments, and multi-value fields
- Flow integration for document libraries and ODB
- Kick off flows for selected items in SharePoint
- Embedding PowerApps in SharePoint
- Using PowerApps to create customized forms

Any new and cool apps in the expo hall?

Insights…

What is the latest on the SharePoint 2016 upgrade and migration story? Update on “Feature Pack” for 2016?

https://blogs.office.com/2016/09/26/announcing-feature-pack-1-for-sharepoint-server-2016-cloud-born-and-future-proof/

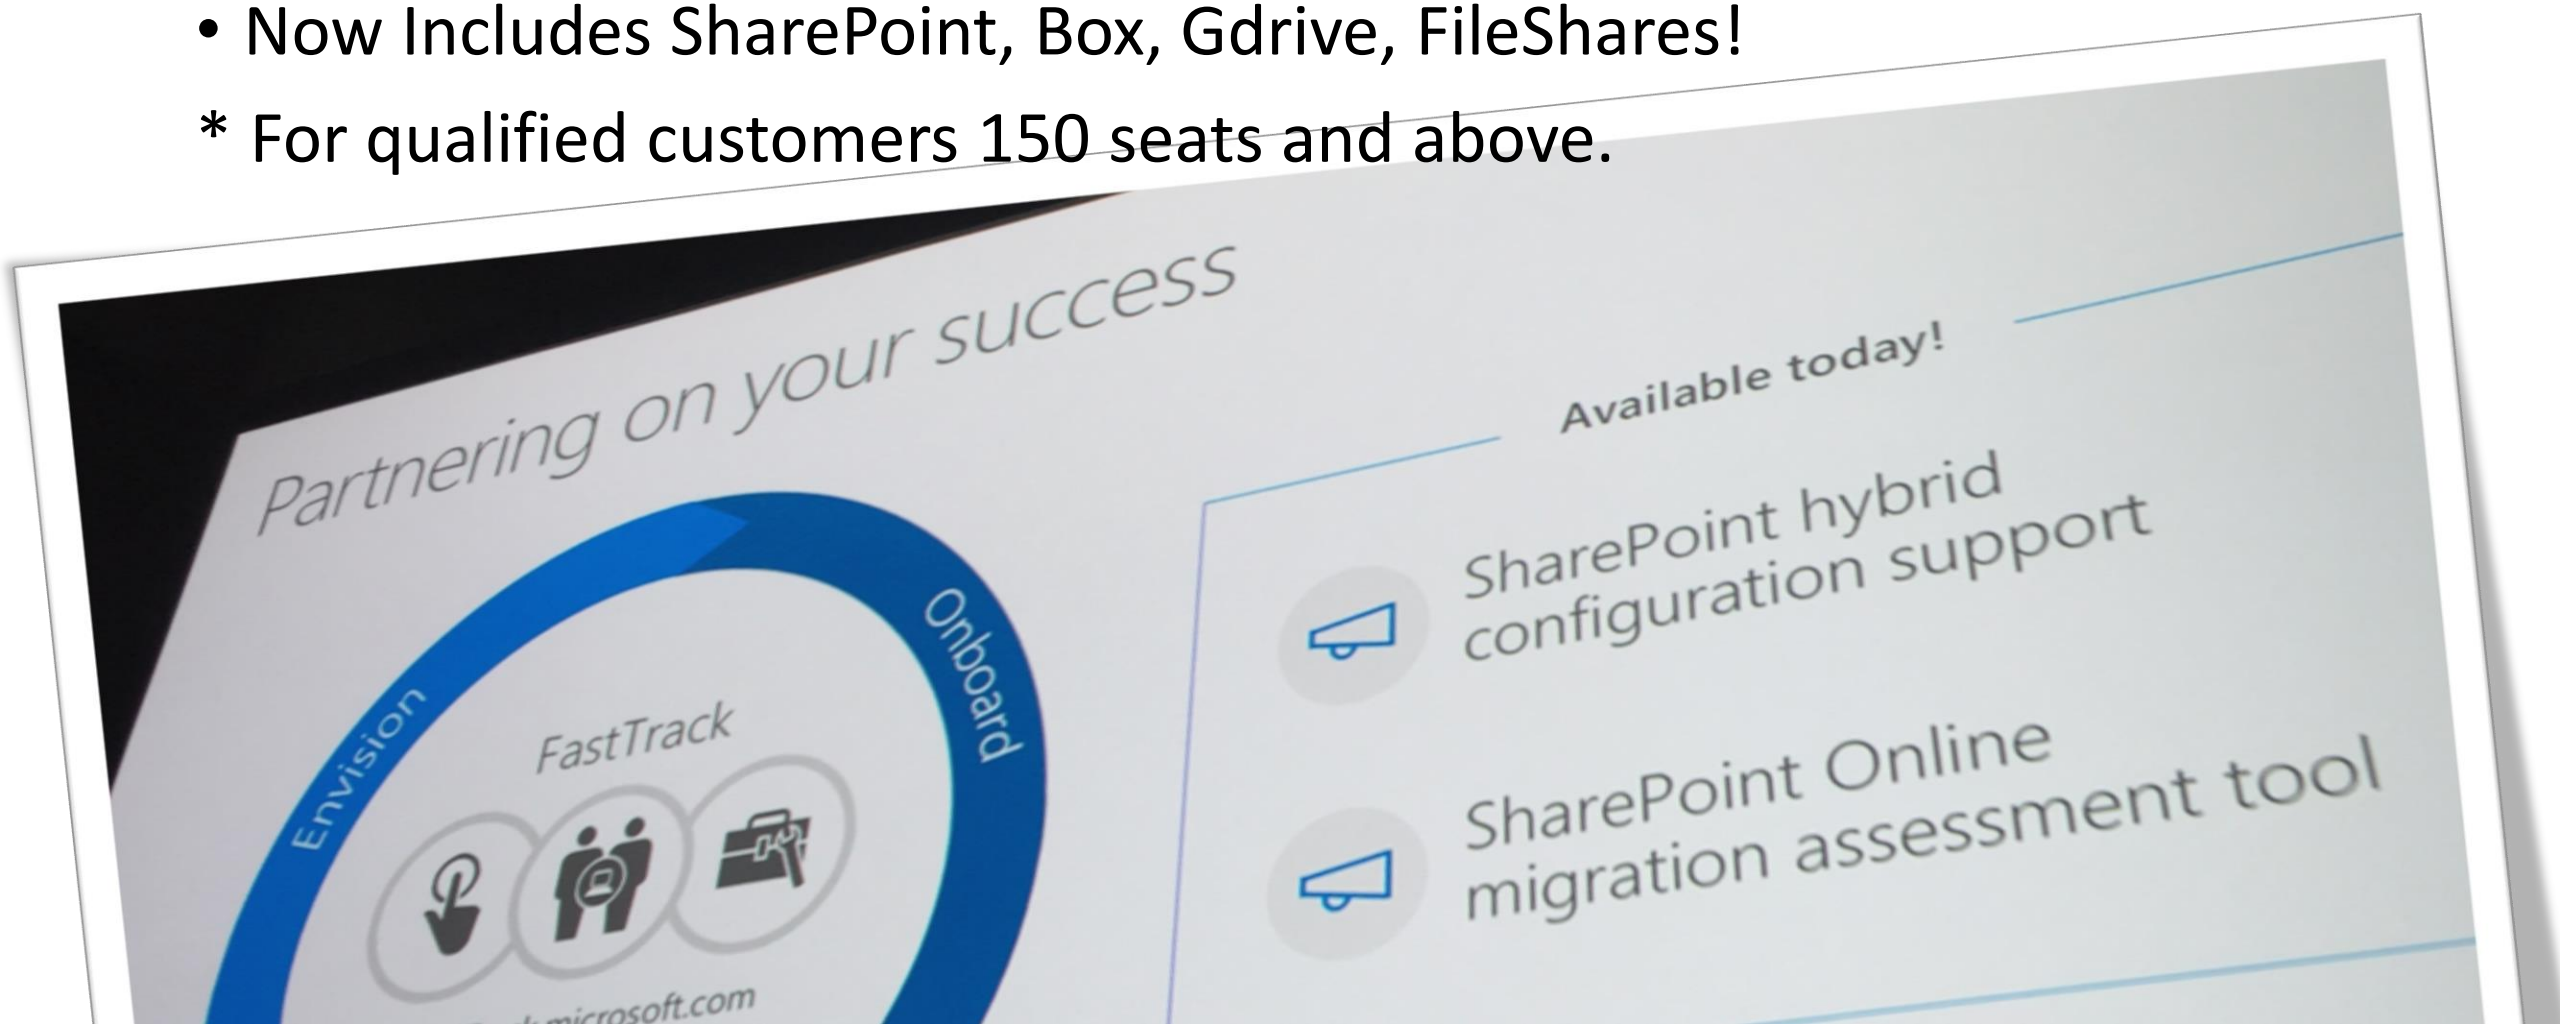
- Logging of administrative actions performed in Central Administration and with Windows PowerShell.
- Enhancements to MinRole to support small environments.
- A new OneDrive for Business user experience.
- Custom tiles in the SharePoint app launcher.
- Unified auditing across site collections on-premises and Office 365.
- Unified taxonomy across on-premises and Office 365
- OneDrive API 2.0

Coming Nov 2016!

FastTrack to Success – Migration to Office 365

- Free* from Microsoft and partners
- Now Includes SharePoint, Box, Gdrive, FileShares!

* For qualified customers 150 seats and above.



Will the SharePoint Framework ultimately take over as THE preferred dev process or experience?

Colligo Engage 2016

October 4, 2016

Presented by Barry Jink

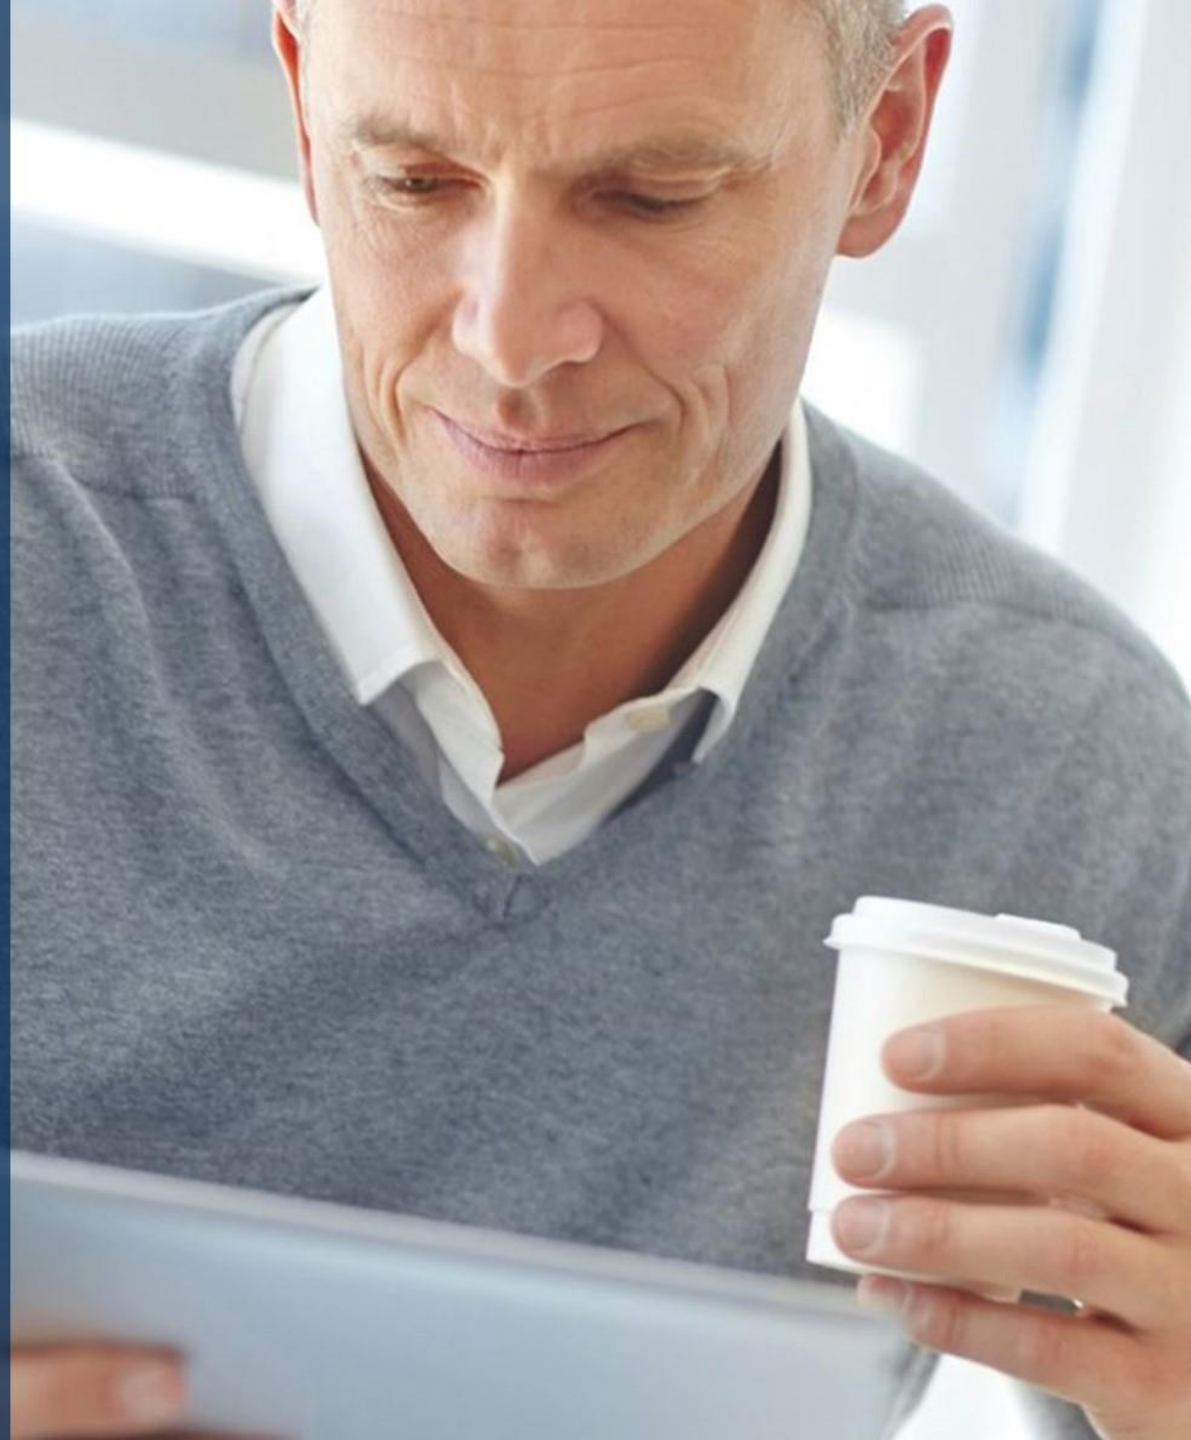
Why Organizations Use Colligo

End-Users Expectations

Enterprise Requirements

End-Users Expectations

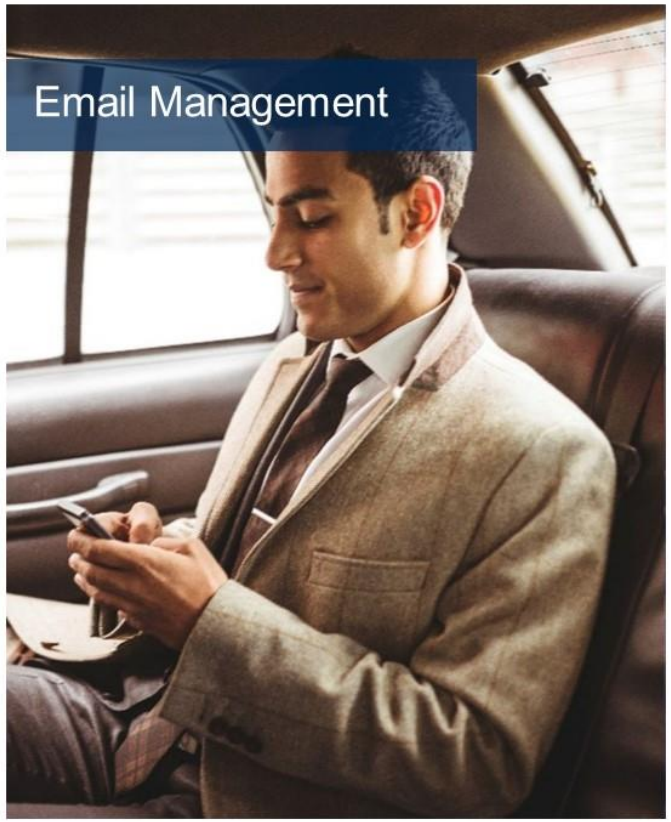
- Work from anywhere
- Unified view into content
- Use own devices (BYOD)
- Simplicity

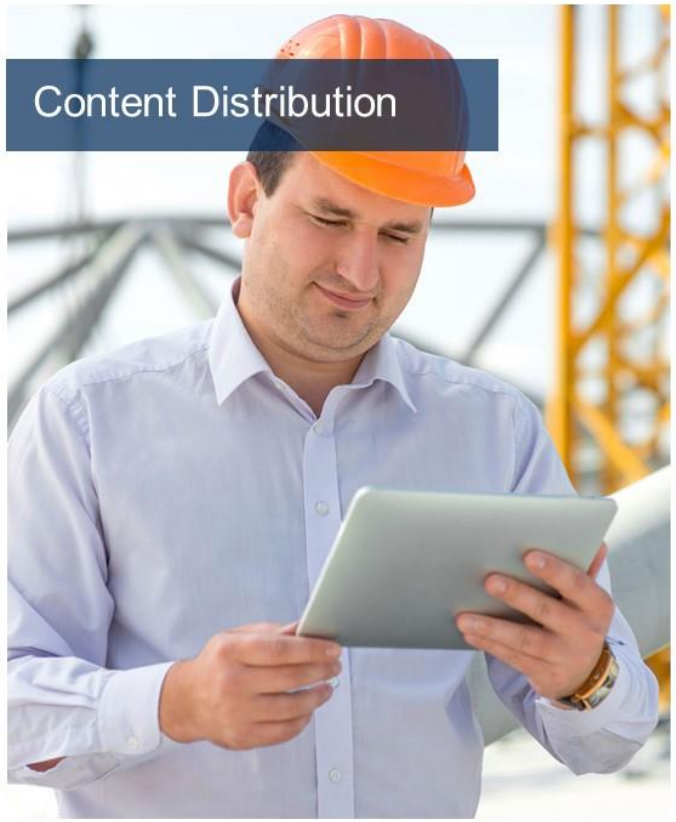


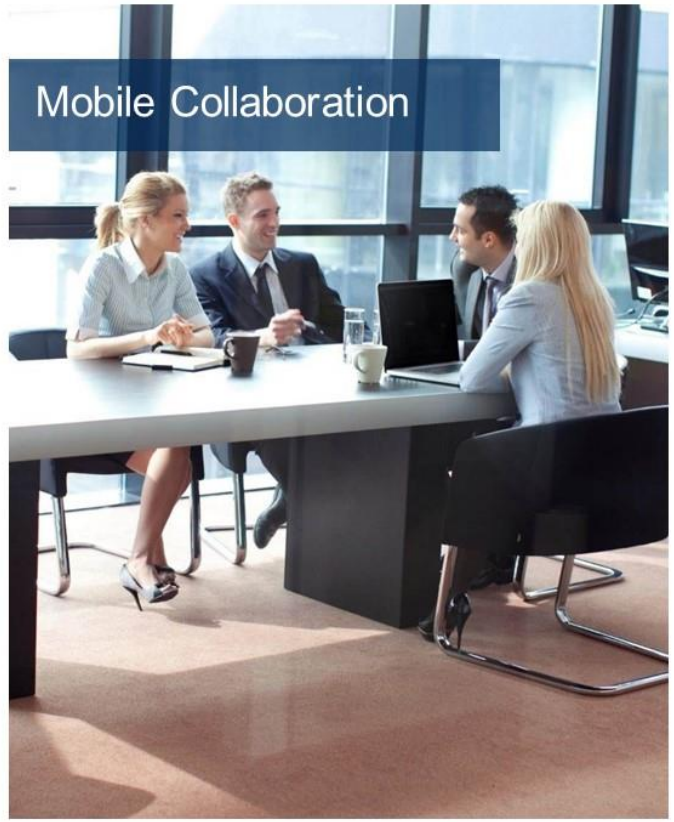
Enterprise Requirements

- Manage mobile records
- Prevent data loss
- Meet compliance
- Keep content in place

Customer Business Scenarios







Email Management

Challenge

- Emails in personal inboxes: liability risks

Business Goals

- Provide easy-to-use, enterprise-grade SharePoint email management solution
- Monitor user adoption, activity and compliance
- Improve eDiscovery, litigation and collaboration processes

Colligo Solutions

- Colligo Email Manager for Outlook and iOS
- Colligo Console

Content Distribution

Challenge

- Outdated documents saved on user devices: reduced operational efficiency and low quality of customer service

Business Goals

- Push the right content to the right people across all their devices
- Allow access to latest content by users in the field
- Track compliance to information management policies

Colligo Solution

- Colligo Briefcase for iOS and Android
- Colligo Console

Mobile Collaboration

Business Challenge

- SharePoint not being used as a file sharing and collaboration tool: unstructured duplicate content in multiple locations and increased data loss risk.

Business Goals

- Leverage SharePoint as the company's content management system
- Empower teams with collaboration tools that are easy to use from any location, on any device.
- Monitor user adoption, activity and compliance

Colligo Solution

- Colligo Briefcase for iOS, Android, Windows, and Mac
- Colligo Console

The Colligo Engage Platform Today

A highly differentiated MCM solution

Specialized Apps	Secure Direct Device Sync	Single Pane of Glass Into Multiple File Share
IT Governance Tools	Auto Offline Caching	Metadata Capture
